

Resource 2

Look at the resource below, which shares some people's opinions about what should be included in the mobility hubs.

What do you think should be included in the mobility hubs?

I would like the mobility hubs to provide drinks, food, snacks and access to facilities where I could freshen up – maybe even shower. I would also like a warm, comfortable place to sit and wait.

Frances

I live in a rural location so have to use my car to access public transport. Free parking on site would encourage me to use public transport for part of my journey rather than just driving all the way.

Anna

I think an entertainment zone would be a great addition to a mobility hub. I would like to be able to relax and maybe play some games or watch some TV whilst I wait to continue my journey.

Jonathan

A mobility hub should include a place to store bikes and other belongings securely until you return.

Gabriella

Somewhere I could get good internet access and charging points for my electronic devices so I know I can work whilst I travel would be my dream!

Taal

It would be lovely to have a garden or park area to walk my dog between buses.

Caden

Information points with people I could speak to and ask for help planning my journey would be useful.
