

## Resource 1

Look at the resource below, which shares more information about dolphins. Does anything surprise you? Do you have any questions you would like to ask about dolphins?

Can you describe what the dolphins look like?  
What colour are they?  
Do they have any teeth?  
How would you describe their beak?

### Dolphin facts

- Dolphins live in water, either the ocean or rivers.
- They eat a variety of food including fish, squid, plankton, octopus.
- On average, they can hold their breath for 10 minutes.
- There are about 40 different species of dolphin.
- A group of dolphins is called a pod. Dolphins are very social mammals that swim together, catch their food as a team and play together.

### Did you know?

There are several stories of dolphins helping humans who have found themselves in trouble at sea!
