

## Resource 1

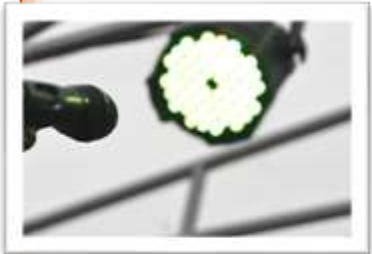

Look at the resource below, which shares some of the roles found in a performance.

Can you think of any other jobs or roles within a performance?

An audience to watch the performance.

A lighting and sound technician to set all the equipment up and control it during the performance.

The performers!

A director to lead the performance and help everyone practise. This is usually your teacher in school performances.

Set designers to design and make the props and scenes needed for the performance.

A stagehand, who works backstage, to help set up and move items such as scenery, props and lighting. They may also control the curtains.

A camera person to film the performance.

Which of these roles do you think you would like? Are there any you would not enjoy?
