

Kingfishers

We have been travelling in different ways during our gymnastics sessions. Last week we learned how to jump and land safely from the apparatus.

Always remember to bend your knees!

We have been using manipulatives in maths to add two amounts together. Children are building their efficiency by "quick counting". We have practiced this by using two dice and counting on from the largest amount.

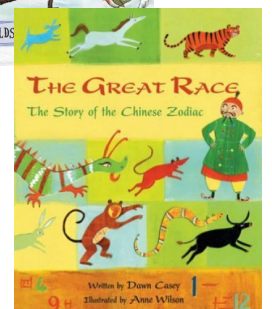

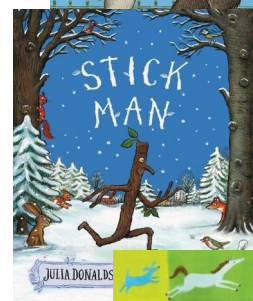

As part of our learning, we have been programming Bee-Bots to follow a map. Children showed great determination and patience to make it move where it needed to! Click or scan the QR code to see us in action!

We enjoyed our visit from Michelle and Hope the guide dog. Did you know that guide dogs start their training from 6 weeks old?

Books
we have
read
and
LOVED!
